Continuation of Substance of Interview including description of the general nature of what was discussed: Attorney was advised that the claims (filed 4/19/2004) to the methods drawn to making and feeding non-human primates would be allowable if a Markush group to the gels and gums listed at specification page 6, lines 5-6 were included in the claims without alginate, so as to avoid the Fajt reference which requires alginate and is drawn to a feed for aquatic animals. It was agreed that the composition claims would be cancelled without prejudice for the filing of a continuation/divisional so that the method claims can be placed in allowance. The amendment filed (7/20/04) after-final will not be entered.
